Honokono, March 3rd, 1890.

THE telegram courteously communicated to the Press by General Edwards to the effect that one of the new 9.2in, guns is now ready for shipment and that further shipments of 10in, and 9.2in, guns will be made at short intervals, has occasioned a general feeling of relief and satisfaction i. t. Colony. For years these guns have been looked for, and at last expectation is to be fulfilled. It cannot be said they have been waited for patiently, for complaints of the-delay that has occurred have been both frequent and loud. We have, however, for -some time been in possession of the lighter portion of the armament. General Cameron, in the course of the discussion on Mr. W. KESWICK'S paper at the Royal Colonial Institute, said :- "The guns, unfortunately, have not all been sent out -I mean the heaviest ones—but in this respect Hongkong is better off than any of the other coaling stations recently fortified." that on this occasion his statements were strictly in accordance with fact. The torpedo defence, however, does not extend far beyond the limits of the harbour, and to prevent the shelling of the town, especially from the westward, we must depend on the fortifications. With the guns already in position the forts would be able to give a good account of any of the men-of-war at present in these waters, and with the heavier guns to be sent out the harbour ought to be rendered reasonably secure against anything less than an attack

COAL IN SANDAKAN BAY.

Mr. Hart Buck

The interest attaching to this subject has been revived during the past month by the arrival of a coal miler, Mr. Mo gan, who has been engaged by the Sandakan Coal Syndicate to examine the coal stratas of Sandakan. Mr. Morgan has a few coolies already at work and is going down upon the seam in two places above the Leila Road. The Commissioner of Lands look Mr. Morgan to see the coal outcrop in the interest, most of the ponies' jumping powers be- Bourgen River in Labuk Bay and Mr. Walker has rendered a report based on the notes made out all jumped extremely well, the round being by him on this visit and on his researches of finished without a single spill or a pony refus- 1888 and previously, from which it would ap ing. On getting away Buddha led first but pear that a very extensive coal basin exists of was quickly picked up by Caswell who led for of which the outcrop is visited at Sandakan on the first time round. On the second round, after the South, the River Simiang in the North Bay taking the first wall jump, Caswell began to on the West, which we referred to in our come up at a ratiling pace followed by Enchanter. September number of last year and at Bongaya Enchanter passed Caswell and kept the lead till on the North. The outcrop of grit under the the finish winning pretty easily, Caswell being Balhalla Range is the limit on the East from second and Venturous third. which four points the strates all dip to a common centre, the greatest inclination being at the for all beaten Subscription Griffins of this south end of the basis. Some idea of the extent season; entrance, 35, to go to second pony; of the district included may be gathered from the distance from Bukit Parang (600 feet) at Bongaya to Leila Peak (840 feet) at Sandakan which is 50 miles north to south and from Balhalla (640 feet) to the River Simiang (sea level) which is 16 miles east to west. The question to be determind by Mr. Morgan is whether or not a paying coal field exists. The pockets found by Mr. Walker in the North Bay gave up to a ton and a half in one solid block of good coal. The Sandakan Shale seams yield a good looking coal of some sixteen inches in thickness and if the whole thickness of shale, as seen at the outcrop, turns into good coal a paying seam may result. Mr. Morgan proposes to run down some distance on and Oamaru third. On passing the Rock the seams and put this question to immediate Rayon d'or followed by Bolero and Laufer be- test. The Syndicate have found sufficient funds gan to come up and on passing the village were to for the purpose and we understand they have the front. On turning into the straight Bolero secured an efficient manager in Mr. Morgan and took the lead, Laufer coming into second place, we hope to record that they have met with the and in this order they passed the Judge's box, success merited by their enterprise. The great value attaching to Naval Coal stations has lately been forcibly shewn by Lord Brassey and it would enormously increase the value of the magnificent harbour we possess if it could be

She anchored at Truson Mumiang on the night of the 6th and started for Sandakan at daylight the next morning. After getting some two miles out to sea the weather came on very thick with thin rain falling. Owing to the state of the weather no land could be seen. 2 The serang put the launch's head round to return to the Mumiang entrance. There was me compass on board the launch, and the serang in charge kept the lead going while trying to find 0 his way in. The water suddenly shouled, and w heavy sea swept over her as she heeled over, her fires were put out and the steam gauge was broken. All the crew and passengers left but four men and two women (Sulus). Of these two men and two women were unfortunately drowned. We believe an attempt will be made to raise the launch which has only some two feet of water round her at low tide. .The first number of the Labuan Gautte is
